

Wesleyan Pension Fund 2035 Portfolio

Investment Strategy

Who should consider investing?

For participants retiring in 25 to 29 years or with minimal need for current income who desire high capital growth appreciation and recognize the possibility for substantial year-to-year fluctuations.

Strategy:

- Emphasis on current income and capital appreciation via balanced exposure to equities and bonds.
- Added diversification from increased exposure to Small Cap and International equities.

Portfolio Performance - As of September 30, 2011

Risk / Return Profile

Important Notes - All Portfolios

- Model portfolios were developed in December 2007 for Wesleyan Pension Fund by the Principal Financial Group and Ronald Blue & Co. as the Plan's investment advisor.
- The exact portfolios illustrated were not available for individual investment during the historical periods illustrated (prior to 2007). The results illustrated are hypothetical and not intended to represent the performance of an actual portfolio that existed. The specific mutual fund mix in the portfolio has varied over the time period illustrated.
- Hypothetical model results have inherent limitations compared to actual trading, may overstate gains and understate losses, were produced with the benefit of hindsight, and can be changed at any time to show better performance. Back-tested results do not give an indication that they could, or would, have been achieved had this strategy been actually in use over the period presented. Broad market and economic conditions may have played a role in performance results, and future conditions may produce different results. More than one fund or index may have been used in creating the backtested performance numbers.
- The selection of a different starting date for the periods illustrated could have materially affected the results portrayed. Other significant economic and market factors, positive or negative, have occurred outside of the periods illustrated and would materially have affected any historic results for the portfolios.
- The performance shown reflects the deduction of RB&Co.'s investment advisory fee. Results reflect realized and unrealized appreciation and the reinvestment of capital gains, dividends, and interest income. Past performance is not a guarantee of future results. All investments involve risk including loss of principal.
- Investment results or returns may vary from participant to participant depending upon the specific investment objective, asset allocation, and timing of participant and plan sponsor investment deposits and withdrawals.
- In the portfolio expense comparison, the expenses of the Wesleyan Pension Fund model portfolio are compared to the average expense ratio of comparable mutual funds in this asset class. Category Avg first takes the average investment manager expense ratio for each asset class in the model portfolio and, using the asset class weights of the model portfolio, computes a weighted average of those average expense ratios.
- In the Portfolio Performance Graph, the Index consists of a weighted average of passive investment market indexes. The average has the same asset weights as the portfolio being compared to it. The portfolio contains mutual funds and separate accounts that are both actively and managed according to a passive market index.
- All information contained within this handout was created exclusively by Ronald Blue & Co., LLC for the sole use by Wesleyan Pension Fund and their plan participants.
